

Wilsonart® Nonflammable Canister Contact Adhesives NF700 & NF740 Series

Wilsonart has created a new, patent-pending, proprietary canister contact adhesive that has the...

SAME reliable performance and application as WA700/740 series adhesives,
NEW nonflammable formulation with nonflammable propellant,
BETTER ingredients - NO Methylene Chloride or nPB.

Wilsonart Advantage

- Formulated from our existing canisterized contact adhesives WA 700 and WA 740 series utilizing the same rubbers and resins for a secure and familiar bond
- DOES NOT contain the solvents methylene chloride or n-Propyl Bromide as its proprietary, U.S. Patent Pending solvent system
- Available in a 9 lb., 30 lb., 140 lb., and 300 lb. canisters that have the same recommended load, coverage, and uses the hardware as their flammable series counterparts
- DOT “Green Diamond” approved canister containing a nonflammable solvent-based adhesive with a nonflammable propellant
